

# The RSM Systems Engineer

## Re-introducing the much loved IBM SE Role

An experienced, friendly consultant, advising and helping you with all your mainframe challenges

### Overview

We find many clients warmly referring back to 'the good old days' when they had the benefit of an IBM Systems Engineer onsite. As a statement of RSM's commitment to the industry and with the aim of providing an even better service to our valued clients, we are pleased to announce the re-introduction of the onsite SE role.

An experienced mainframe consultant with over 25 years' industry experience: maintaining; optimising; securing; leveraging; upgrading; migrating; justifying etc. Helping advise you, he or she can call upon the expertise of any member of RSM Partners' widely experienced technical team, now numbering more than 60 senior specialists.

## Purpose

The RSM SE role will act as trusted counsel: sharing industry and technical experiences on all aspects of the mainframe; advising on strategies deployed by similar organisations; helping you resolve any issues you may have; and being your first point of contact for any technical queries.

### Typical activities may include:

- Exploring technical and business requirements, advising on best possible solutions (vendor independent)
- Discussing similar projects previously delivered elsewhere, by way of case studies, leveraging both RSM and personal experience
- Delivering industry and technical news updates and announcements: upcoming product releases; implications of upgrading, etc.
- Assisting with future proofing your mainframe resources and staff training
- Cost saving strategies
- Acting as an interface between your organisation, RSM and other partners

RSM Partners is uniquely focused on mainframe expertise, software and services. Focusing solely on the IBM Mainframe platform, RSM works with many of the world's largest organisations - spanning financial, retail, utility, government and services. No other partner can offer you the same mix of in depth mainframe knowledge and hands-on experience, all delivered reliably, flexibly and with agility. The RSM Partners name is widely regarded for the value we bring and recognised at the highest levels within IBM.

We look forward to being of service to you.
